

## The Multifunctional Gasoline Improver

# InjectorKleen™

More Power

Less Pollution

Application	Directions and Treat Rate
<b>Control Combustion Chamber Deposits and Keep Entire Fuel System Clean</b>	Use every 3,000 miles. When gasoline fuel tank is nearly empty, pour the entire contents of one (1) 12 ounce bottle of Injector-Kleen 3000 into the tank. Refuel with up to 20 gallons of gasoline.
<b>Maintain Stored Fuel</b>	Add one (1) 12 ounce bottle of Injector-Kleen 3000 per 225 gallons of stored gasoline.

### ➔ Total Fuel System Cleaner for Gasoline Engines

Injector-Kleen™ 3000 contains a revolutionary deposit-neutralizing formula that not only cleans the entire vehicle fuel delivery system, but also reduces the octane appetite of your engine! Injector-Kleen 3000 restores the power and torque to your engine performance and improves fuel economy. Injector-Kleen 3000 cleans combustion chamber deposits, fuel injectors, carburetors, intake valves and ports and helps remove water to fight gas line freeze.

**To maintain LIKE-NEW engine performance, the recommended treatment is just once every 3000 miles!**

The Injector-Kleen 3000 Additive system is designed to quickly remove combustion chamber deposits to reduce the engine's appetite for higher octane gasoline. Eliminate engine knocking and pinging with just one tankful of gasoline treated with a single 12-ounce bottle of Injector-Kleen 3000.

Dirty injectors and carbonized intake valves can cause incomplete combustion, hard starting, rough idling, stalling and hesitation, decrease in power, loss of fuel economy and increased emissions. Injector-Kleen 3000 uses advanced detergent technology to help control or eliminate these performance robbing deposits from your fuel injected or carburetor fuel system.

### Injector-Kleen 3000's powerful additive technology:

Has undergone tens of thousands of miles of road simulator laboratory testing to demonstrate effectiveness.

Controlled road tests and millions of miles of consumer use have verified that Injector-Kleen 3000 can help reduce or eliminate engine knocking and pinging.

Helps make engines perform like new and restores lost engine power.
